Survivor Super Detangler and Shine

EQyss conditioners and detanglers are among the most sought-after pet grooming products in the industry. Their special, non-toxic formulas are designed not to damage or coat hair and they contain special ingredients to pull moisture from the air to hydrate and replenish hair. Survivor Detangler and Shine uses an alcohol-free blend of special ingredients to create a superior, leave-in detangler that can be used on wet or dry hair.

Karen McDermott, Edinburgh says:

This product is to good for words. The smell is out of this world. The great thing about this product is that you really only need a small amount to have a sleek glistening tail. I found I didn't even need to use this product every day as its last for a couple of days on my mares mane and tail. I also found it particularly useful to apply a small amount before I brushed my mares mane and tail to prevent breakages. Use can even use this product on your own hair as the quality is that fantastic.

Marigold Spray

Marigolds have kept people's gardens free of bugs for years. It's a well known fact. This non-insecticidal spray uses marigolds in the same way. EQyss Marigold Spray™ (patent pending) The spray creates a barrier on the skin to stop odors and protects the skin from the things associated with the hot Summer. A long lasting botanical product that creates a shield against pesky flies and bugs. EQyss Marigold Fly Spray repels dust and dirt. Will not burn or sting eyes or open wounds. Can be sprayed on face and ears. PESTICIDE FREE! NON-TOXIC.

Again another real winner from EQyss products. Flies are a real pain in the summer and what is worse is the foul smell that often comes with the all important sprays. That was until now!! The smell of this product is almost edible, and not only that it really works.

Deborah Collins, Derby says:

After long hot sweaty rides this product still kept the flies away as well as those dreaded midges. And the easiest way to see this product in full glory is to take a look at your friends that you're riding with and see for yourself the difference. This is definitely the fly spray for me and my mare. Try it for yourself.

★★★★★

Avocado Mist

An oil-free, silicone-free leave on conditioning spray that maintains the moisture balance within the hair shaft. Avocado Mist prevents the hair from becoming dry, brittle, and breaking off. Avocado Mist is the ONLY detangler that does not contain oil, silicone, wax, or synthetic polymers. Shines and conditions the coat with a unique formula that combines the extracts of avocado and aloe vera. Detangles without the heaviness common in most conditioners.

Caroline Strong, Kent says:

I was luckily enough to be asked to try out this product on my horse for HorseMart. Being traditionalists when it comes to the good old fashioned silicone based products I was really keen to try this out. I'm sold! Not only does it smell gorgeous the product itself really left my horse coat soft as well as a gorgeous sheen. There was no greasiness often link with this sort of product so in the show ring no judge would ever be able to tell. A product truly worth investing in.

MegaTek Rebuilder

Megatek Strengthens hair so mane and tail won't break off easily. Makes hair healthier and stronger. Amazing results when used on mane rubbed out with combo rugs, sweet-itch etc. You won't believe the results when used on your horse dry brittle manes and tails to give them added strength & length. Hooves: Makes hooves grow from 10% to 50% faster and makes them 30% stronger. Sand cracks are reduced, quarter cracks heal faster, shoes hold better

Cindy Godstone, Cornwall says:

This truly is a miracle product. If I could only have one horsey product in my grooming box this would be It! No horse should leave home without this. My mare rubbed the base of her mane through wearing her combo rug during the winter and being a skeptic I didn't think this would really work. But I have to say I was blown away by the results in the 3 weeks I trialed this product this is a product I'll always use.

Beeswax Barrier Hand Cream

Our Beeswax Barrier Hand Cream works fast helping to heal your cracked hands and feet. It penetrates deeply, moisturising your skin and is non greasy so you don't even know it's there helping you. It's also water resistant so it protects your hands from getting chapped, stained and engrained with oil and dirt etc. www.starkiesbeeswaxcreams.com

Joanne Warlow, Weybridge says:

I have recently had surgery on my thumb to repair the ligaments that I cut through with a dirty blunt pen knife that I use to cut the hay bales open while cutting a lump of hose for the hay soaker!!!! Why oh why do we do it????? Horses, who'd have em Anyway this little pot of cream turned up and when I read the little leaflet that came with it I decided that I would try it on my thumb to help heal and hopefully reduce scaring. I also suffer with dry skin and in the first few weeks (before the cream) my arm under the splint was so dry and itchy. I don't know if the cream helped with healing and the scar but it certainly stopped the dry skin and my hands have been fantastic since using it. Regarding the actual injury all I can tell you is the surgeon at my appointment commented on how beautifully it had healed and how good the scar looked. I am a customer now for sure!

Sarah Mardon, Kent tested on her dogs says:

I have a Staff & a Jack Russell. The staf suffers from weird dry patches that appear every now and then in random places on his body. The Jack is true to form and always up to mischief resulting in a few cuts and minor injuries especially behind the collar where he gets stuck trying to catch his latest victim! I have used the Bees cream for a month and have noticed a marked improvement on both conditions. In fact I also used it on the horse on a few week old cut that had gone dry and that too is looking really good. I guess this is one of those must have's for any grooming box! Thanks a lot!
